Research Question: How does development and changes in vegetation affect the location of deer in North Carolina?

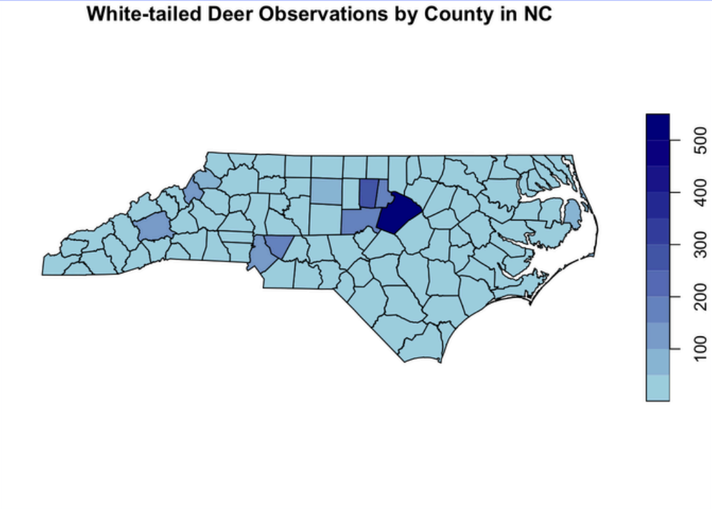

Proposed dashboard: R Shiny

Interactive controls

Observation period (years)

County

Map Variable

Map 1: County Level spatial patterns

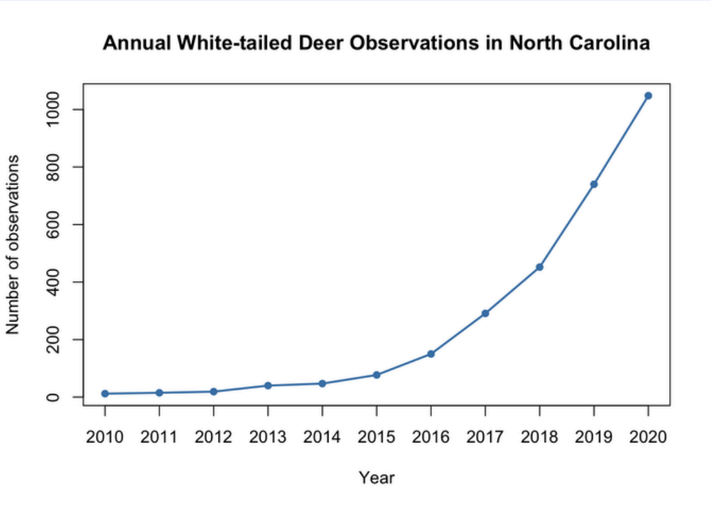

Figure 1: Annual observations

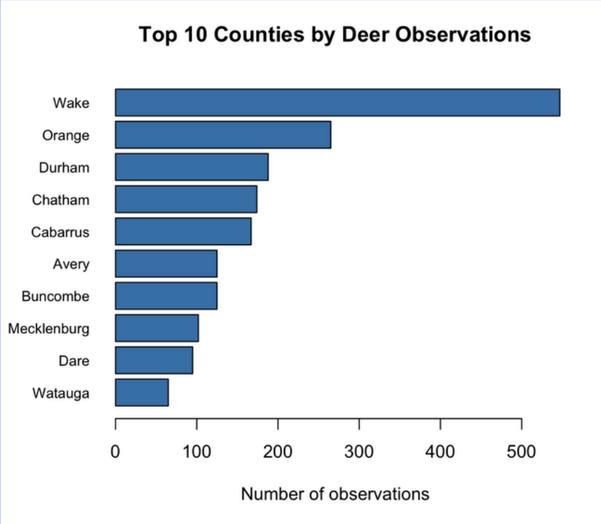

Figure 2: County-level observations

Dashboard Feature	Question Answered
County deer observation map	Where are deer observations concentrated by county?
Annual observation line graph	How have deer observations changed from 2010-2020?
Housing Development Map	How do deer observations changed in counties that become more developed?
Vegetation Change Map	How do changes in vegetation cover affect deer locations?

Next steps: Figure out the distances of deer from developed areas bordering wildland vegetation. We will divide tasks based on statistical analyses, spatial analyses, and dashboard development.
